

CERTIFICATE NOX / SOX / CO₂ - REDUCTION

This certificate verifies that the use of IKO carrara, IKO carrara Tecno SN or IKO powergum 4 AW/F Atelia with its cutting-edge Air Care Technology for the project stated below, will potentially achieve a 20% reduction in the nitrogen oxides and sulphur oxides present in polluted air and a considerable reduction in CO₂.

Project name:

Roof surface in m²:

Located at:

This equates to a direct **reduction in air pollution** of kg NOx per annum

kg SOx per annum

and an indirect CO₂ reduction of kg

This data was obtained following measurements by the independent Onderzoekscentrum voor de Wegenbouw (OCW – Road Construction Research Centre). To this end, we refer to the official test report EP9276. The CO₂ reduction was calculated using the official BWA (Bitumen Waterproofing Association) databank and calculation modules.
